Valerie,

Here is the requested information:

1. Third party industry organizations:

None at this time. I am a member of ARTIST (Asian Region Tobacco Science Team), but the membership by industry scientists is personal and the group is not an incorporated industry organization. ARTIST does not fund any research. I have served as a scientists of an 'Adhoc scientific group' of the German VdC before 1996.

2. Working group memberships:

External:

- SOT (US Society of Toxicology) Inhalation Specialty Group, no research funding
- SOT Risk Assessment Specialty Group, no research funding

Internal (PM):

- "Places Strategy & Coordination Counsel" (PSCC), PMUSA

3. Professional Societies:

- US Society of Toxicology
- American Association for Cancer Research
- International Epidemiological Association
- ASIATOX
- German Society for Experimental and Clinical Pharmacology and Toxicology (DGPT)
- Society for the Advancement of Biomedical Research (Germany)
- Society for Biological Chemistry (Germany)
- German Society for Environmental and Mutation Research (GUM)
- EUROTOX (incl. in membership of DGPT)
- European Environmental Mutagen Society (incl. in membership GUM)

I hope this answers your questions. Please communicate via Rebecca, if you need more information.

Kind regards,  
Roger
